

ABSTRACT OF THE DISCLOSURE

The invention relates to a fastening device for an elongated object, in particular a cable tree, having a holder (1) intended for attachment of the elongated object and an adjacency surface (5) for the elongated object, and having a fastening element (16) connectable to the holder (1) for fastening the holder (1) to a part. For connection of the holder (1) to the fastening element (16), a plug-in assemblable snap coupling is provided, closable by a force directed against the adjacency surface (5) of the holder (1).
